

Economic II – The nursing bed at a good price

185 kg safe working load, 4-section mattress base, electrically adjustable

safety level of frame rails: approximately 40 cm

extremely solid construction of frame rails

hand switch with central locking function

high-quality and robust castor Tente

drive system HiWin being easy to maintain and durable

drivability under the bed with all commercially available lifters

foot section height adjustment

lower leg rest liftable by Rastomat (can be delivered for an extra charge)

space-saving delivery and storage on storage and transport kit

Your advantages:

- **Quality and durability**

The nursing bed „Economic II“ is extremely solid constructed, so that it fulfills the requirements in daily care perfectly. The high quality ensures you a nursing bed which is durable, robust and easy to maintain and which decisively minimizes the follow-up costs.

- **Economic efficiency / easy mounting by one person**

The cost effectiveness is exceptionally reasonable. Nevertheless there was no economizing concerning the construction and the material. Especially the use of high-quality materials ensures the Burmeier quality philosophy. The nursing bed is mountable and dismountable by one person, without tools – and this within a few minutes!

- **Safety level of frame rails: approximately 40 cm**

Mattress and pressure ulcer systems of max. 16-18 cm thickness can also be placed in the nursing bed without adaptable frame rail raisings. In many cases costly raisings are not necessary.

Nursing bed „Economic II“

Nursing bed „Economic II“

> Performance

4-section mattress base 90 x 200 cm, height adjustment of the lying surface approximately 40 – 80 cm, back rest and thigh rest as well as the height of the lying surface are adjustable via electric motors. The foot section height is adjustable by swivelling of the lying surface. Metal parts are sealed with a polyester powder lacquer coating, in the colour topaz. The head and foot board fillings are in beech finish. Hand switch with central locking function.

Finished according to:

- > norm DIN EN 1970:2000 + A1:2005
- > norm DIN EN 60601-2-38/A1:2001 (reduced for home care requirements)
- > expected norm DIN EN 60601-2-52

> Order numbers
